

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Resilient MM Balanced Managed Fund, X Accumulation, a fund within LF Resilient Investment Funds (ISIN: GB00B2RHRS47)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

Objective and investment policy

Objective

To achieve a total return (the money made or lost on an investment from the combination of income and capital growth) after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 80% of the fund worldwide in the following asset classes: equities (company shares), bonds (for example, loans to either a company or government that pay interest), hedge fund strategies, property, infrastructure, commodities (for example gold) private debt and private equity.

The fund may also invest up to 20% in money market instruments (which are short term loans that pay interest) and cash.

The fund can invest across different geographic areas and industry sectors without limitation and the exposure to equities (company shares) will range from 40% to 85% of the fund.

The Investment Manager determines the mix of asset classes and geographic areas to achieve the fund's objective, and then on an ongoing basis assesses economic conditions and market opportunities and will adjust the amount invested in the different asset classes, geographic areas and industry sectors accordingly.

Other features of the fund:

- The fund is actively managed. The Portfolio Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund may invest in other funds (including those managed by the Manager, the Portfolio Manager and their associates).
- When the fund invests in the following asset classes this will be indirect, for example, by buying other funds: commodities, hedge fund strategies, infrastructure, property, precious metals, private debt and private equity.
- Whilst the fund can invest in different asset classes it may not have exposure to all asset classes at all times.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest 100% in lower risk assets such as cash.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.

- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Bonds Risk: The fund may invest in bonds, these are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of investment. The value of a bond is also affected by its perceived credit risk.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

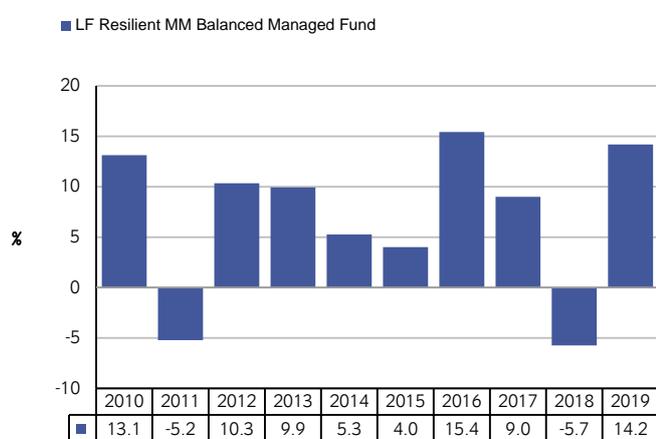

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	1.21%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses as at 31 May 2020. This figure may vary from year to year. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund. This is normally only charged when the dealing costs are significant.

For more information about charges, please see the prospectus Sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in August 2008 as Resilient 5 Fund and has since been re-named to CF Resilient 5 Fund and latterly LF Resilient MM Balanced Managed Fund.
- Performance is calculated in Pounds Sterling.

Practical information
